## Hangover Buster

By CSD Staff

Pillar Rock USA Corp. has introduced Hangover Buster, an effervescent tablet specially formulated to prevent hangover symptoms such as nausea, headache, excessive thirst, fatigue, muscle ache and sensitivity to light and noise. Arriving in select convenience stores, drug stores and supermarkets nationwide, a package of Hangover Buster includes three individually foil-wrapped tablets, to be dissolved in water and taken throughout an evening of alcohol consumption. Each lemon-lime flavored Hangover Buster tablet includes a blend of Vitamins A, C and B12 as well as ginseng extract and other FDA-approved ingredients. Available over-the-counter, the product is sugar, dairy and animal product-free. Hangover Buster was formulated by a team of physicians and laboratory chemists who carefully selected ingredients that target a hangover by not only rehydrating the body, but also by restabilizing the vital vitamins, minerals and amino acids that have been lost from alcohol consumption.
